

It's okay to...

make small websites
do everything in a web browser
use your favourite tools
use your favourite text editor
imagine what would make life simpler
care about function and aesthetics
not know everything
ask questions
say no
throw things away
consider multiple perspectives
like HTML, CSS and JavaScript
not like HTML, CSS and JavaScript
switch off your computer from time to time
be kind to yourself, be kind to others
have coffee with colleagues
